

## Safety Drench Shower

Product Code: S2200

Whatever your safety requirements, you can rely on this stainless steel emergency shower. Wall mounted for unparalleled stability, the unit's diminutive proportions keep it out of the way of your workers, while the stainless steel construction means that it will outlast lesser products several times over. The unit also comes with bright yellow detailing to aid visibility, even in smoky or dusty environments or in emergency situations where the user's eyesight might be compromised.

All it takes to activate this stainless steel wall mounted emergency drench shower is a tug on the low-resistance pull rod. Once activated, the unit will discharge water without interruption thanks to a stay-open ball valve. We take safety seriously here at Safety-Eyewash.co.uk, which is why we've also included a waterproof inspector's tag so that you can undertake weekly safety testing and comply with ANSI Z358.1 guidelines. To read more about the guidelines, [visit our guide to ANSI regulations](#).
