

Foot Control Freestanding Eye Wash Fountain With Lid

Product Code: S0340-CS1-HFC

This freestanding eye wash fountain with lid and foot control is the most durable and versatile product in our eye wash range. The 'clam shell' style lid protects the stainless steel bowl and spray nozzle assembly from dust, debris and microbes, while the cast iron floor flange means that it can be mounted wherever it's needed most. The unit can be activated by an easy-press handle or a floor pedal, and once operational it can be used completely hands free.

Our freestanding eye wash unit with lid and foot control comes with bright yellow detailing to ensure maximum visibility. It also comes with a waterproof test card to facilitate weekly safety testing, which is required for ANSI compliance.

This foot control free standing eye wash fountain with lid currently has no extras available.

What is ANSI compliance?

Safety eye wash equipment is manufactured in accordance with ANSI Z2358.1, which determines things like water temperature and flow rate; however, in order to be fully compliant with the regulations, you as the end user also have a responsibility to make sure that the unit is installed, maintained and used correctly. [Visit our guide to ANSI regulations to find out what you need to do to achieve compliance.](#)

Related products

Our basic [pedestal eye wash station](#) comes without a lid or foot operation and offers excellent value for money. Similarly, our [wall mounted eye wash units](#) are cost effective and extremely simple to install, making them ideal for smaller businesses. We also sell [portable eye wash stations](#) which require no plumbing whatsoever, meaning that they can be used anywhere.
